****Bubble Shooter - Features:****

- Combine bubbles and make them burst: In Bubble Shooter, your goal is to combine bubbles of the same color to make them burst and clear the field. To burst bubbles, you have to combine at least three bubbles of the same color. The level is over as soon as you have cleared all bubbles from the field.
- Easy control: The control of Bubble Shooter is very simple: If you move your finger over the screen of your smartphone or tablet, you move the laser in the direction of the bubbles. If you take your finger off the screen, you shoot.
- Three game modes: You can play Bubble Shooter in three different game modes. While you have to clear the board in puzzle mode to advance on the map and get rewards, in level mode it's about taking as few shots as possible to get more stars. In the so-called classic mode you have the choice between the difficulty levels easy, medium and difficult.
- Color-blind mode: In order that also color-blind people can play bubble shooter, the game is equipped with a special color-blind mode.
- Leaderboard: On the leaderboard you can compare yourself with your friends and other players from all over the world.
- Select target method: You can choose three different target methods in Bubble Shooter. You can either use the laser or the cross-hairs to aim at the bubbles, or just tap on the screen to aim properly.

Conclusion: Bubble Shooter is a funny and colorful puzzle game for smartphones and tablets. Combine the bubbles cleverly to clear the field with as few shots as possible. Since you have three different game modes and target methods available, the game is always varied and exciting.
