

# FaceApp: Neural Face Magic

## **\*\*About FaceApp: Neural Face Magic\*\***

The photo editing app FaceApp: Neural Face Magic allows you to add unique effects and filters to your pictures.

FaceApp: Neural Face Magic is an app that lets you edit your photos. Especially realism plays a big role in the app: The edited photos should not look completely different, but look as realistic as possible. You will search for any effects like rabbit ears in vain. If you shot a photo or selected a photo from your gallery, you can add different effects to it. For example, you add a beautiful and bright smile to your face, make you look younger or older, or change your gender. You also have the opportunity to improve your selfies with different filters. Another special feature of FaceApp is that you can also create funny GIFs and collages.

## **\*\*FaceApp: Neural Face Magic - Features:\*\***

- Change your look: FaceApp: Neural Face Magic makes it possible to see new facets of you. This photo editing app is not designed to create a beautiful and sweet, but a realistic picture. For this reason, there are no sweet bunny and dog ears filters, nor filters that make you completely flawless. To use the app, you must first take a photo or select a photo from your gallery. At the bottom of the screen you will now see the available effects in the form of emojis. For example, there are two different smile effects that make you shine and smile. In addition to a hot filter, there are also two effects that make you look younger or older. If you're really keen on experimenting, you can also change your gender. You always wanted to know what you would look like as a man? Here's your chance.
- Improve your selfies: The app has not only many different effects, but also filters. These filters can make your selfies even more beautiful and unique.
- Create collages or GIFs: FaceApp: Neural Face Magic allows you to create GIFs or collages from your edited images. By combining up to four images into one image, you can see the changes between the images even more clearly. Then you can send the collage or the GIF to friends or upload them on social networks.

Conclusion: FaceApp: Neural Face Magic aims at a presentation that is as realistic as possible. The effects of this app are not intended to beautify you or make you flawless. The effects should show you in a funny way, how you could look like in 30 years, for example. For this reason, the app is suitable for all fans of photo realism.
