

Chess - Play & Learn

****About Chess - Play & Learn****

The App Chess - Play & Learn allows players to play chess on the go against millions of players worldwide. In addition, players can use helpful lessons and instructional videos to improve their chess rating.

The App Chess - Play & Learn gives you the chance to play chess against millions of players from all around the world. In addition, the app helps you to improve your chess skills by providing helpful lessons from chess grandmasters and instructional videos. In addition, you can access over 50,000 tactical puzzles and have your games analyzed to avoid mistakes in future games. You can either play against real players or against a chess computer, where the strength can be adjusted individually by you.

****Chess - Play & Learn: Functions****

- Play Chess: The App Chess - Play & Learn allows you to play chess against millions of players from all around the world. You can challenge either your friends or unknown players and compete against them in exciting real-time blitz. You also have the possibility of playing a round of correspondence chess once a day. While you only have a limited amount of time to think about each move in blitz, you can think longer about each move in correspondence games. If you do not want to compete against real opponents, you also have a special chess computer available. The special thing about this chess computer is that you can adapt the strength of the computer to your abilities.
- Improve your skills: The app does not only offer you the possibility to play exciting chess games, but also to improve your chess rating. For this you have numerous lessons and instructional videos of chess grandmasters available, in which, for example, moves or special games are explained to you. Interactive educational videos also help you to connect theory and practice.
- Tactical puzzles: In addition to instructional videos and lessons from chess grandmasters, you'll also find over 50,000 tactical puzzles in the app. These puzzles, which are also designed to improve your chess rating, automatically adjust to your level. That's why the puzzles achieve success even later.
- Practice openings: A good opening is crucial for a successful chess game. For this reason, the app has a large database in which you will find numerous openings.

Conclusion: Chess - Play & Learn is not only for chess professionals, but also for beginners of chess interesting because the app offers numerous lessons, instructional videos and a chess computer that can be adapted to your skills.
