In addition, you will meet many other campers, who always need your help. If you can help them, you'll get great rewards with which you can expand your campground.

****Animal Crossing: Pocket Camp - Features:****

- Help other campers: When you explore the vast area of Animal Crossing: Pocket Camp, you will always meet other campers who need your help. They are looking e.g. for fresh fishes or fruits. Grab your fishing rod, shake vigorously on each fruit tree and collect as many fishes and fruits as possible. If you bring the desired objects to the campers, they will give you construction and craft materials that you can use to expand your campsite further.
- Build new objects: The given materials of the other campers can be optimally used for the construction of new furnishings or for crafting new objects. To get new items for your campsite, just open the catalog which is included in the app and order it from Björn. Within minutes, hours or days, your order will arrive.
- Make friends and win new guests: If you help other campers time and time again, have a nice chat, and make friends with them, the other campers may soon demand greater favors from you like the procurement of furnishings. If you can get the desired items, the campers will soon visit your campsite as guests.
- Design your campsite: Since you can choose between many objects and furnishings, you can design your campground individually according to your ideas. You decide whether you prefer a classic or a more modern version of the campsite.
