

Crush the Castle

****About Crush the Castle****

In Crush the Castle players must use a catapult to destroy the enemy fortresses. For this they have different ammunition available.

Crush the Castle offers catapult action at its best. With the help of your catapult, you must destroy your opponent's fortress. Your catapult can be loaded with a variety of ammo, from stones to torches. With a simple shot it is usually not done. Often you have to fire at the fortress or the castle of your enemy several times to destroy it completely. The number of shots you need to destroy the enemy castle determines whether you will receive a Gold, Silver, or Bronze medal for the level. There are a total of over 100 exciting levels available that are both varied and challenging.

****Crush the Castle - Features:****

- Destroy the fortress of your opponents: In Crush the Castle, you are on the battlefield. In the more than 100 levels you have only one task: you have to destroy the fortress of your opponent. For this you have a catapult available. First, the fortress of the opponent will be presented to you. This will allow you to study the enemy's castle closely and understand its design. With a simple touch on the screen, you shoot your ammunition. Now you can see how your shot flies and where it hits the fortress. Your next shot should at best hit the fortress's weak points in order that it collapses completely. When the castle is completely destroyed, you have successfully completed the level.
- Receive medals: The fewer shots you need to destroy the castle, the better your gameplay performance, of course. The number of shots determines whether you receive a gold, silver or bronze medal. Of course, your goal should always be to finish all levels with a gold medal.
- Unique ammo: Your catapult can be loaded with a variety of ammunition. So you can fire at your enemy's castle not only with stones and boulders, but also with fire.
- Unlock new skins: In the course of the game you have the opportunity to unlock new skins for your catapult. However, for this you have to perform particularly good and complete many levels with a gold medal.

Conclusion: Crush the Castle is an entertaining mobile game that remains exciting and challenging due to its varied levels, even after several hours of play. In addition, players are encouraged by the various medals to complete the level as best as possible.
