

Fast Flash - Browser and Player

****About Fast Flash - Browser and Player****

Fast Flash is a video player for smartphones and tablets, with which you can play videos in almost all formats.

With Fast Flash, you can watch every video on the go. Since the app supports almost any format, playing the video on your mobile devices does not even require a prior conversion to a compatible format. The app plays videos in many formats, for example, mov, mpeg, wmv, mp4 or avi. The app is not only fast, but also very easy to use and clear. To upload videos to your device and play them with the app, all you have to do is connect your smartphone or tablet to your computer and add the video files in iTunes.

****Fast Flash - Features:****

- Watch videos in any format: Watch videos in any format on your smartphone or tablet with the handy and fast Fast Flash video player. The app supports a variety of formats, so playing the video on your mobile devices does not require any previous file format conversion. For example, the app plays videos in mov, mpeg, wmv, mp4, avi or mp3 formats.
- Upload videos to your device: Fast Flash plays only videos that are already on your smartphone or tablet. This means, that you have to add the videos first in order to watch them. To do this you need to connect your device to your PC and open iTunes. After selecting your device and going to the "Apps" category, you will see the sub-item "Share Files". When you select the "Fast Flash" app, you can add video files to it. Once the video files have been imported to your device, they can be played with Fast Flash.
- Simple, fast, reliable: Fast Flash convinces above all by a clear presentation, a simple operation and an enormous speed. It also supports high-resolution video playback. This allows you to enjoy videos on the go even better.

Conclusion: Fast Flash is a fast and handy video player with which you can play videos in any format. Since the app supports almost any video format, converting the video to a mobile-friendly file format is no longer necessary.
