

Google Home

****About Google Home****

With the Google Home app, users can set up and control their Google Home and Chromecast devices or other boxes that work with Google Assistant.

Google Home will make your home even smarter. Use the app to set up and control your Google Home or Chromecast devices. You can also discover rich multimedia content from well-known providers such as Netflix or Spotify in the app and play it directly on your Chromecast or Google Home device. The app also offers you the possibility to manage your device settings or try out new features of your Google Home box.

****Google Home - Features:****

- Manage your devices: If you use the Google Home app, you can easily set up and control all Google Home devices and devices connected to a Chromecast. In addition, the app gives you access to all boxes that are equipped with the Google Assistant. Connect with the smart devices and boxes in your area and control them with the help of the app.
- Discover multimedia content: The app gives you a good overview of popular multimedia content from well-known providers such as Netflix or Spotify. Search for TV-series or music, select the content and play it directly on a Google Home or Chromecast device.
- Control your devices: Use the app to easily control all your Google Home and Chromecast devices. Start streams, press "pause" or change the volume of the stream with just one click.
- Manage the settings of your boxes: In the app, you have the possibility to change the settings of your speakers and Chromecast devices. For example, you can change your location or choose which music provider should be played by default. You can also connect compatible devices to your app so that, for example, also the thermostat can be controlled with Google Home.
- Use tips and advices: The app gives you tips and advices on how to get the most out of Google Home.

Conclusion: With the Google Home app, all intelligent devices from Google can be used optimally. With the help of the app you can not only set up, but also control and manage Google Home and Chromecast devices.
