

# Heads Up! Kids

## **\*\*About Heads Up! Kids\*\***

Heads Up! Kids combines the well-known game principle of the popular party game with child-friendly functions. Instead of words, the terms are presented as images.

With Heads Up! Kids, you can now easily play the popular guessing game with your kids. If your children cannot read yet, that's no problem at all: Since the game has been specially designed for children, all terms are presented as pictures. In each round a term is assigned to each player, which he has to guess with the help of the other players. In order that the player does not see the term, he must hold the smartphone, on which the term is shown, to his forehead during the entire round. If you need a new card, you just have to tilt the smartphone up.

## **\*\*Heads Up! Kids - Features:\*\***

- Designed for kids: With Heads Up! Kids you can play the popular guessing game now also with your kids. The game was designed to be particularly child-friendly and age-appropriate so that, for example, all terms are displayed as pictures. In addition, the categories have been adapted to the interests of a child. Instead of celebrities or movies, you have to guess different animals or activities.
- Hold the smartphone to your forehead: the special thing about Heads Up! Kids is that the game of course does not work with cards, but with your smartphone. The image to be guessed is displayed on the smartphone. In order that the player, who is next, does not see the picture, he has to hold his smartphone to his forehead during the whole round. If you need a new term, you just have to tilt the smartphone up and a new term appears on the screen.
- Play with up to 100 people: You can play Heads Up! Kids either in pairs or with up to 100 players at the same time. For this reason, the game is suitable both for the afternoon activity of your children and for large children's birthday parties.
- Use your own photos: In Heads Up! Kids you have the opportunity to take your own photos and add them to the game. Because of that, your children can also guess objects and animals from their immediate environment.
- Take a video: If you hold the smartphone to your forehead, it can record a funny video of your teammates with the help of the front camera. This allows you to look at the desperate explanations of your fellow players at the end of the round. This is not only funny for you, but also for all other participants.

Conclusion: Heads Up! Kids is great fun not only for kids but also for adults.
