

PlayerXtreme Media Player

****About PlayerXtreme****

PlayerXtreme is a media player for smartphones and tablets that allows you to watch videos and movies in any format.

With the PlayerXtreme you can watch movies and videos on the go. The big advantage of this universal and practical media player: It plays almost every format. So you do not have to convert movies into a format that your smartphone or tablet supports. The PlayerXtreme supports formats such as flv, m4v, mp4 or mpeg. All your films will be presented in a well-arranged media library, which is also equipped with an intelligent search function. The media player also supports HD playback of all formats and subtitles in almost any language. Easy-to-use fast-forward and rewind controls let you enjoy a unique movie experience on your mobile devices. You also have the option of protecting all content with a password.

****PlayerXtreme - Features:****

- Play any format: With the help of the PlayerXtreme you can play videos and movies in almost any format on your smartphone or tablet. The media player supports formats such as 3gp, flv, m4v, mov or wmv. This has the great advantage that many films do not have to be converted first in order to play them on mobile devices.
- Organize your library: All your content is presented in a well-organized library, so you have a good overview of all the movies and videos in your collection. The media library also has an intelligent search function that makes it even easier to find movies. You can also import files from your computer directly to your smartphone or tablet.
- Features of the HD player: A special feature of the PlayerXtreme is that it supports HD playback for all formats. When you use PlayerXtreme, you do not have to forego high-resolution playback on your smartphone or tablet. In addition, the PlayerXtreme supports subtitles in almost any language. You can even determine in which font size the subtitles should be shown or at which position they should appear.
- Protect your library: If not everyone should have access to your library, you can protect it with a password. To allow individuals to access folders or files from your library, you must first create a guest access for them.

Conclusion: PlayerXtreme is a handy media player for smartphones and tablets, with which almost any format can be played. With the help of this media player you can experience a unique movie experience in high resolution even on the go.
