

Speedtest by Ookla

****About Speedtest****

By using Speedtest app users can easily and quickly determine their smartphone's surfing speed.

Speedtest allows you a quick connection test which tests the connection of your smartphone to WLAN as well as to mobile networks. Speedtest also shows you a list of all connection tests and detailed reports.

****Speedtest – features:****

- Determine your surfing speed: With the help of Speedtest you can easily and quickly determine your smartphone's surfing speed. The app does not only test the connection to WLAN but also to mobile networks. The app shows the results of the connection test in clear graphics. By using the app you can also bear your connection stability in mind.
- Results and detailed reports: Under the category "results" you find a list of all past connection tests together with detailed reports. Like that you have an easy overview of possible variations in your surfing speed or your connection stability.
- Different tools: Speedtest allows you to adjust some settings in order to edit the app according to your preferences. You can e.g. set the app's graphic display or determine which server should be used for the testing.

Conclusion: By using Speedtest you bear the surfing speed and the connection stability of your smartphone or tablet always in mind.
