

Stack AR

****About Stack AR****

Stack AR is an Augmented Reality game for smartphones and tablets where players have to try to stack blocks as high as possible.

In Stack AR you have to try to stack floating blocks as high as possible. In this game concentration as well as timing is in demand. You have to tap the display of your smartphone or tablet at the right time in order to stack the blocks as precise as possible. You can either play the game in the classic layout or you choose the Augmented Reality mode where you can play the game in your real environment.

****Stack AR – how does it work? ****

-**Stack blocks:** In Stack AR you have to stack blocks as high as possible and build the highest tower by that. Blocks float from left and right during the game which you have to stack skillfully. In Stack AR good timing is important: Tap the display of your smartphone or tablet at the right time in order to stack the blocks as good as possible. If this failed, the projecting parts of the block are cut off. Because of that the following blocks become smaller and smaller. As soon as the tower is too small and no blocks can be stacked on it, the round is over.

-**Compare your stacking skills:** You can compare your high scores easily with other players from all over the world in the Game Center.

-**Fulfill missions:** In Stack AR you not only have to try to build the highest tower but also fulfill different missions. If you solved these missions successfully, you receive rewards like diamonds with which you can buy other game layouts.

-**Augmented-Reality:** Stack AR is an Augmented Reality game, which means that you can play the game either in the classic layout or in Augmented Reality mode. Find a flat surface in your environment on which the first block can be placed and start stacking blocks in your real environment.

Conclusion: Even though Stack AR has a simple playmaking, it impresses with its Augmented Reality mode. Because of that you can play the game in your real environment whereby you can enjoy the game even more. Stack AR is a fascinating and clear designed game for which you especially need good timing and high concentration.
