

STARZ

****About STARZ****

STARZ is a streaming service, which provides users with thousands of current films and series. All content can be viewed directly online as well as offline.

The app from the streaming provider STARZ allows you to watch your favorite series and movies on the go. In addition, new content is added every week so you can always access the latest movies and series.

****STARZ - Functions:****

- Large selection of films and series: STARZ offers you a wide range of current films and series. This allows you to watch your favorites without an Internet connection. In addition, you are not tied to a particular location. For example, STARZ's extensive offering includes hit series such as Outlander, Black Sails or The Missing or popular movies like Ghostbusters, Passengers or Don't Breathe. Since you can find movies and series of every genre, you will surely find the right one for you.
- Constantly growing offer: New movies and series are added every week, so you can always benefit from the latest content. In addition, there is always new content to discover.
- Connect with Spotify: If you have a Spotify account, you can benefit from a very special feature of the app. When you connect your Spotify account with the STARZ app, new films and series are regularly proposed to you. These recommendations are based on the music you like on Spotify. In addition, Spotify offers you the possibility to listen to the soundtrack of movies or TV shows you're watching.

Conclusion: With the STARZ app you benefit from unlimited series and movie enjoyment, even when you're on the go. However, to use all the features of the app, you must sign up for a subscription.
