

Timepage

****About Timepage****

Timepage is a smart calendar app from Moleskine, with which you keep your appointments always in view. The app not only has a clear calendar, but also a weather forecast and a route planner.

With Timepage you are always well organized. The app helps you to keep track of all your appointments to use your day efficiently. Thanks to the clear design of the app, it only takes a glance to view the dates of the day or the week. In the intelligent monthly view you can also see which days are already occupied and which days are still available. The app does not only have a smart calendar, but also a handy weather and rainfall forecast. In addition, the app shows you how long it takes to get to your next appointment. Since the app syncs automatically, you can retrieve your appointments on the smartphone and on the tablet or computer.

****Timepage - Features:****

- Clear calendar: Timepage is a smart calendar for your smartphone or tablet developed by Moleskine. The app convinces above all by a clear design. The simple design allows you to view all appointments of the day or the week with just one look. You can decide if the weekly calendar should be limited to five days or extended to ten days. The app also has a so-called monthly heatmap where you can see directly on which days you have free time.
- Use current weather forecasts: Timepage is equipped with a weather and rainfall forecast. Thanks to this helpful feature, you always know how dress or whether you'd better use the car.
- Calculates your route: Timepage has up-to-date traffic information and maps. The app uses these information to plan your route. The app will tell you how long it takes to get to your next appointment on foot, by car or on public transport.
- Compatible with other calendars: Setting up your timepage calendar is quick and easy. Since the calendar is also compatible with other calendar apps or programs such as Google Calendar, Outlook, or Exchange, the appointments from these calendars are automatically transferred to Timepage.
- Sync between devices: Timepage automatically syncs your data. This means that you have access to your appointments not only on your smartphone, but also on your tablet or computer.

Conclusion: Timepage allows an easy and efficient planning of your appointments.
